Foundation Certifications
FHA/HUD & VA Foundation Certifications for Manufactured Homes

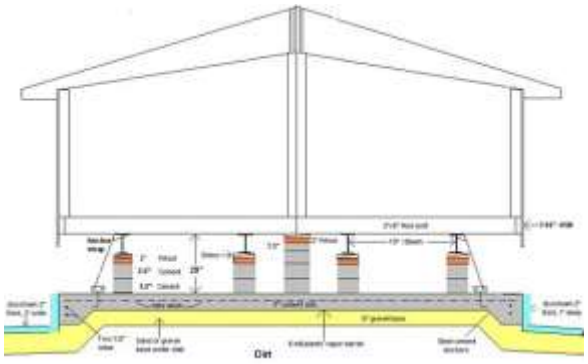
# MANUFACTURED HOME FOUNDATION CERTIFICATIONS

FOUNDATION CERTIFICATIONS provide an array of engineering services to the manufactured home industry. We provide support with your manufactured home transactions by providing an Engineer's Foundation Certification. We have the most streamlined order process, which was designed with you in mind. There are no forms to complete and fax; simply visit our site and complete the online form in our state-of-the-art Order/Management System. Once you submit the order, we will immediately go to work on your project.

The Engineer's Certification specifies that the foundation complies with the HUD Permanent Foundation Guide for Manufactured Homes (PFGMH - HUD 7584), a requirement for all FHA-insured loans. On VA & FHA-insured loans, the foundation on all manufactured homes must meet specific criteria of structural stability and an **Engineering Certification is required.**

## We provide Engineer Foundation Certifications for:

- HUD/FHA compliant permanent foundations
- VA permanent foundations
- Conventional loan permanent foundations
- Modular homes



## We are Professional Licensed Engineers.

We are also able to design new foundations for new manufactured homes and design retrofits for non-compliant homes.

Our goal is to provide you with a hassle free, smooth transaction. Our job is successfully completed when our customers are happy. Our average turn-around time is **3 to 5 days,** with rush service available.

**Ordering a Foundation Certification couldn't be easier!** Please contact the local area representative below, or simply complete our online order form at **www.FoundationCerts.com/order** and our team will immediately go to work for you!
